Alexander Green

We create offices which are
refreshingly **different**

For twenty years we have been helping our customers' businesses grow and succeed.

Quality is at the heart of all we do... and our reputation has been built on consistently delivering high quality products, service and support.

Our clients range from large commercial enterprises to schools and colleges, public access offices and home office set-ups.

Strange as it may sound, we're really passionate about office design and office furniture. We care deeply about our customers and relish the challenge of delivering the perfect solution for the unique requirements. Whether you need an office chair to ease an aching back, an additional work space for a new recruit, or a bespoke office redesign, we are here to help.

Our product knowledge, experience in problem solving and commitment to first-class communication really sets us apart. We don't charge for advice, space planning and general support - that is just a part of the service that keeps our customers coming back to us year after year. When you purchase from Alexander Green you can be 100% confident that your purchase will meet your needs and your budget... and we guarantee to make your working life run more smoothly!

Why not give us a call on 01763 500115 or e-mail sales@alexandergreeninteriors.co.uk to request a no obligation quotation.

Glue-less Technology

We have developed and enhanced our manufacturing techniques which now enables us to be **totally glue-less** in the production of our ranges.

All of our upholstered backs have been fitted with an **E-badge** which has helped us to **lower our carbon footprint**, **enhance our production process** and help make our chairs up to **99% recyclable**.

In turn, this process has led to a more consistent and defined upholstery finish which has **increased aesthetics** and **enhanced the curves and contours** of our product.

Information On Demand

We've developed a new **QR Scanning system** that allows customers to scan the code on the underside of their chair and retrieve assembly and user instructions instantly.

As well as removing a time consuming process from our production line, this has also helped us to be more **environmentally friendly**, as we are now printing up to **50,000 less sheets of paper** containing user instructions and assembly guides per year!
